Subject of Review: Natural disasters can cause income losses for livestock producers by diminishing grazing capacity of land, driving disease, or directly causing livestock losses. Under the Agricultural Act of 2014, several disaster programs for livestock administered by the Farm Service Agency became permanent, and eligibility requirements were relaxed. These disaster programs include the Livestock Forage Disaster Program, the Livestock Indemnity Program, and the Emergency Assistance for Livestock, Honey Bees, and Farm-raised Fish Program. This report examines how these programs work and summarizes where in the United States payments for these programs have been distributed.

Purpose of Review: The purpose of the review is to ensure the high-quality of the economic analysis, transparent explanation of methods, objective interpretation of results, and effective communication to the intended audience.
